Summary

I build performant single page web apps, modern REST APIs and enterprise quality websites. A dedicated professional who's always learning; I strive to deliver modern, well tested software that's elegantly coded, efficiently architected and beautifully designed.

Experience

Contract Senior Developer - Freshfields Bruckhaus Deringer | Oct 18 - Present

Developing cutting edge internal software to manage legal matters on a global scale. Working on both the .NET Core backend and React + TypeScript frontend with a strong focus on security, testing (unit, integration and E2E) and performance. I delivered features across the stack to the extremely high standards demanded by one of the largest law firms in the world.

Contract React Developer - Lush Cosmetics | Aug 18 - Oct 18

Returning to Lush for a second contract term to assist in a migration of the React front end from REST + Redux to GraphQL + Apollo. Leveraging my experience with the technologies in question and with their existing systems to deliver the replatforming.

Contract Developer (React & .NET) - Parkeon Transit | Sep 17 - Aug 18

Led the development of the frontend for a new account based ticketing system for some of the largest public transport providers in the world. I developed multiple white label portals from the ground up with React + Redux servicing both passengers and transit operators along with supporting APIs all with a high degree of test coverage and delivered ahead of schedule.

Contract React Developer - Lush Cosmetics | Aug 17 - Sep 17

I came in to provide extra development resource to meet a tight deadline for the rebuild of Lush's public website, bespoke CMS and event organisation systems built in React+Redux with full i18n and driven by a suite of microservices. Working closely with the inhouse developers to deliver on time with a focus on performance, accessibility and UX.

Head of Software Development - Jolt My Car | Jul 16 - Aug 17

A greenfield software driven startup. I led the development of the Jolt My Car accident reporting app and associated services, websites and tools. Planning, architecting and delivering robust, well tested, high quality software that powered the business.

Sourcing and organising internal developers, contractors, 3rd party providers and mentoring juniors. I developed and delivered a full suite of backend services (C# .NET Web API), customer facing websites and internal monitoring tools (React + Redux).

Senior Software Developer - *LetMe* | Aug 15 - July 16

Working in a greenfield proptech startup as part of a small team to design and build a full set of systems to power the innovative lettings business and drive the customer journey.

Created multiple frontend interfaces for managing properties, applications and customer communications using React. Architected, built and maintained a number of critical backend systems hosted in Azure and built in C# ASP.NET.

Full Stack Web Developer - *Bright Blue Day* | Oct 14 - Aug 15

Full Stack Web Developer, at Bright Blue Day using C# .NET MVC, Umbraco and Sitecore CMSs, Javascript (AngularJS, D3 and jQuery) and PHP.

Taking on a wide range of technically challenging products from full multilingual consumer facing websites for international corporations; to a bespoke photo booth running on ChromeOS; and REST APIs powering iOS applications.

Software Developer - *Decoded Solutions* | Oct 12 - Oct 14

Software Developer at Decoded Solutions. Working on a wide range of technical projects developing bespoke software and database solutions. Development undertaken in a wide range of technologies including C#.NET, JavaScript (AngularJS, jQuery), PHP, MySQL, MSSQL, SSRS and Java (including Android) for Desktop, Mobile, Server and Cloud Computing environments.

Web Developer - *Muc-Off* | Feb 12 - Oct 12

Worked as part of a two man team to completely redevelop the ecommerce website porting products and user accounts from the previous site.

Web Marketing Executive - *Intergage* | Jul 05 - Feb 12

Part time studio assistant, working on a wide range of projects during school and university holidays. Website content, SEO, PPC and social marketing.

Student Programmer - *UK Atomic Energy Authority* | July 09 - July 10

Working in the control and diagnostics department for the Joint European Torus (JET) nuclear fusion reactor.

Education

University of Bath - *BSc (Hons) Computer Science* | 2007 - 2011

Technologies

C#, .NET, .NET Core, ASP.NET MVC, Entity Framework, Azure.
JavaScript, ES6/7, TypeScript, React, Redux, Jest, Enzyme, GraphQL + Apollo, Cypress.
